

Byron White Formulas

Your formula(s): _____

Byron White Formulas are concentrated botanical combinations that have herbal extracts specific to different bacterial, viral and fungal infections as well as detoxification support.

How to dose:

- ~ Start with 1 drop per day in 2-4 oz. of water.
- ~ Continue with 1 drop a day for 3-5 days, and then increase by 1 drop for the next 3-5 days and repeat.
- ~ Continue this pattern until you experience a Herx reaction or symptom flare. Stay at that dose until the reaction passes then increase by 1 drop every 3-5 days until you experience another Herx or you reach 30 drops per day.
- ~ Once you reach 30 drops per day continue at that dose until you have gone 2 months with no symptoms.

When you experience an increase in symptoms be sure to drink plenty of water and you can take frequent Epsom salt baths until they pass.

These are very concentrated formulas; because of this the formulas can solidify in the dropper. There is nothing wrong with the formula; it is just the solid particles precipitating out. Try to flush the dropper by inducing suction to get it loosened up. If that does not work you can try a small needle or toothpick, but at your own risk, it is glass and it can break.
